PROFESSIONAL SUMMARY

Lead Unity Developer with 9+ years of experience building and shipping Unity/C# games and apps for mobile (iOS and Android), AR/VR (Meta Quest, AR Foundation, ARKit) and WebGL. Led and mentored a team of 20+ Unity engineers delivering free-to-play mobile titles for publishing partners Halfbrick and PeopleFun, including Fruit Ninja 2, Jetpack Joyride and Wordscapes Search, and shipped Fruit Ninja VR on the Meta Quest Store. Hands-on owner of gameplay systems, scalable client architecture, performance optimization (stable 60 FPS on mid/low-tier devices, ~35% lower memory, 120+ FPS on Atomic Golf), multiplayer, backend integration and monetization (IAP, ads, remote config). Uses AI-assisted development tools (Cursor) in production work. Seeking a remote Lead or Senior Unity Developer role.

Shipped titles: Fruit Ninja VR (Meta Quest) · Fruit Ninja 2 · Jetpack Joyride · Wordscapes Search · Atomic Golf · Big Stakes 5 Dominoes · Chef Qailo · Sound Storm · Donny Thump · SQRRRL

TECHNICAL SKILLS

- **Unity & C#:** Unity3D / Unity 2D, C#, gameplay systems and mechanics, game architecture and modular systems, ScriptableObjects, Addressables, physics, game AI, procedural generation, UI systems, DOTween, Spine, TextMeshPro (RTL), particle systems
- **XR (AR/VR):** Meta Quest and Meta Quest 3, VR, AR Foundation, ARKit, WebAR, cross-platform AR/VR simulations
- **Mobile & Platforms:** iOS, Android, WebGL, PC/Mac; cross-platform builds; Xcode, Swift; ANR resolution
- **Multiplayer & Backend:** Netcode, server-client architecture, matchmaking, Nakama, PlayFab, WebSockets, RESTful APIs, GraphQL, Skillz; third-party SDK integration (Firebase, AWS S3, AdMob)
- **Performance:** Profiling and debugging; gameplay, rendering, memory and network optimization; frame-rate targets (60-120+ FPS); asset bundle and WebGL size optimization (<5 MB)
- **Monetization & Live-Ops:** Unity IAP, AppLovin mediation, Google AdMob, Firebase Remote Config, reward systems, in-game currency, tournaments, push notifications, playable ads (Unity Playworks)
- **Tools & Workflow:** Git, GitHub, PlasticSCM, JIRA, Trello, ClickUp, Cursor (AI-assisted coding), custom workflow, editor and admin tools, Eleven Labs API
- **Leadership:** Team leadership, mentoring, code reviews and coding standards, technical reviews, resource allocation, delivery planning, client communication, process improvement

PROFESSIONAL EXPERIENCE

Userwise | Remote
Lead Unity Developer | *Mar 2024 – Current*

- Led the end-to-end technical lifecycle of mobile games published with partners Halfbrick and PeopleFun, including Fruit Ninja 2, Jetpack Joyride and Wordscapes Search.
- Led and mentored a team of 20+ Unity engineers and established code review standards that **reduced post-release bug reports by 30%.**
- Architected core gameplay and reward systems for Fruit Ninja 2 and power-up mechanics for Jetpack Joyride; deployed a new IAP architecture and monetization schemes using Unity IAP, AppLovin mediation and remote configuration.
- Ported Wordscapes Search from Monkey Engine to Unity and architected dynamic level generation that fetches backend constraints via REST APIs and Firebase Remote Config.
- Introduced workflow process improvements and reporting design systems that accelerated project delivery and performance enhancements.

Narsun Studios | Lahore, Pakistan
Senior Unity Developer | *Feb 2022 – Mar 2024*

- Optimized runtime performance, **reducing memory footprint by ~35%** and maintaining a **stable 60 FPS** on mid- to low-tier mobile devices.
- Spearheaded core client-side architecture for scalable AAA-style mobile and cross-platform titles.
- Built robust asset pipelines with Addressables and ScriptableObjects in close collaboration with art, design and backend teams.

Invozone | Lahore, Pakistan
Senior Unity Developer | *Oct 2020 – Feb 2022*

- Architected and shipped **5+ AR/VR and hyper-casual games**, optimizing memory usage and frame rates across target mobile platforms.
- Delivered multiple cross-platform AR/VR simulations and set up asset optimization pipelines for smooth runtime performance.

Geniteam | Lahore, Pakistan
Senior Unity Developer | *Feb 2019 – Oct 2020*

- Built, debugged and optimized core 3D gameplay mechanics across multiple mobile titles.
- Worked with cross-functional development teams on large-scale shared Unity codebases.

AA'LA Solution | Lahore, Pakistan
Junior Unity Developer | *Dec 2017 – Feb 2019*

- Developed interactive 3D and augmented reality (AR) mobile games using Unity and C#.
- Implemented core game logic, user interfaces and physics systems from early prototype to production.

KEY PROJECTS

Fruit Ninja VR (Meta Quest Store) | *Meta Quest* | Tech: Unity, C#, VR, Meta Quest, Meta Quest 3

- Shipped Fruit Ninja VR on the Meta Quest Store; also built projects for Meta Quest 3.

Fruit Ninja 2 (Halfbrick) | *Lead Unity Developer* | Tech: Unity, C#, Spine, Git, Cursor

- Architected core gameplay and reward systems; integrated remote configuration and monetization features.

Jetpack Joyride (Halfbrick) | *Lead Unity Developer* | Tech: Unity, C#, Unity IAP, AppLovin mediation, Particle System, Cursor

- Architected power-up gameplay mechanics; deployed a new IAP architecture and monetization schemes (Google Play and App Store).

Wordscapes Search (PeopleFun) | *Lead Unity Developer* | Tech: Unity, C#, Firebase Remote Config, RESTful API, Spine, GitHub, Cursor

- Ported the word-puzzle game codebase from Monkey Engine to Unity; architected dynamic level generation driven by backend constraints over REST APIs.

Atomic Golf (Flite Range V6) | *Lead Unity Developer* | Tech: Unity, C#, WebSockets, PlayFab, Addressables, Trackman

- Integrated Trackman-driven mini-games and real-time systems, **boosted performance to 120+ FPS** and built a scalable Addressables-based 3D course architecture.

Big Stakes 5 Dominoes | *Lead Unity Developer* | Tech: Unity, C#, Nakama, Skillz

- Developed a fast-paced multiplayer dominoes game blending skill-based gameplay and poker mechanics, with in-game currency and transparent scoring.

Chef Qailo | *Lead Unity Developer* | Tech: Unity, C#, Eleven Labs API, WebSockets

- Built an AI chef-assistant app (App Store) in which users chat with a chef avatar that guides them through recipes in the kitchen.

Mob Control Playable Ads (Voodoo) | *Unity Developer* | Tech: Unity, C#, Unity Playworks, WebGL

- Built playable ads and prototypes for the hit hyper-casual title; optimized WebGL asset bundles and rendering to meet ad-network limits of under 5 MB.

Sound Storm | *Unity Developer* | Tech: Unity, C#, REST API, GraphQL, GitHub

- Medical diagnostic and rehabilitation app for hearing-impaired patients: implemented audio processing, quiz mechanics and automated patient progress reporting synced to backend servers.

DGA Card Web AR | *Unity Developer* | Tech: Unity, C#, AR Foundation, WebGL, WebAR

- Developed a commercially used WebAR app: scanning a special card displays an invitation hologram above it in AR space.

Donny Thump and SQRRRL (Prize Miner) | *Unity Developer* | Tech: Unity, C#, REST API, WebGL, Swift, Xcode, Google AdMob, Firebase

- Competitive casual mobile tournament games with real-life rewards and scoreboards (Google Play and App Store); integrated REST APIs, AdMob ads and Firebase notifications for tournament releases.

Additional projects: Visit Saudi Metaverse (immersive third-person heritage simulator; REST API, RTL TextMeshPro) · Mojaz Car Insurance walkthrough (interactive UI; RTL TextMeshPro, DOTween) · AR Alphabet (volunteer; AR Foundation, ARKit, Addressables streaming) · Slinky Ride (open-source hyper-casual prototype with a dynamic level editor; ScriptableObjects).

EDUCATION

Bachelor of Science (BS), Software Engineering | University of the Punjab, Lahore, Pakistan | GPA: 3.76/4.0
